

**Fertility** – Intelligent creativity seeded with your thoughts and imagination causing the outcomes you REALLY want.

**Your next step:**

Direct your imagination constructively with clear communication of what you REALLY want by recording your Personal values and Tangible Expectations in an organised way. Your Higher Mind, Consciousness, creates outcomes in your reality with this information; providing you with direct feedback as to the effectiveness of your communication.

There may be a few emotional attachments to release along the way. Yet, by making Distinctions, decisions based on your experience, you are accumulating wisdom. Be sure to write in positive present time (as if it is happening now) language (the language of Consciousness) and only write about yourself so you are not setting goals for others.

Go forth and multiply – materialise your ideas, based on your personal values, into your reality.
